

Pascal Jutras-Dubé

pjutrasd@purdue.edu | +1 765-337-9282 | pascaljd.github.io | github.com/PascalJD | Google Scholar

SKILLS & INTERESTS

Current Interests: Generative Modeling & Sampling, Diffusion LLMs, Stochastic Processes, Monte Carlo, Bayesian Inference, Optimization

Programming, Frameworks, & Tools: Python, JAX, PyTorch, Hydra, Weights & Biases, Git

EDUCATION

PhD	Computer Science	Purdue University	2023 – Present	GPA 3.95/4.0
MSc	Computer Science	Université de Montréal	2020 – 2022	GPA 4.3/4.3
BSc	Mathematics and Computer Science	Université de Montréal	2017 – 2020	

EXPERIENCE

Research Assistant

Jan 2023 – Present

Purdue University

- Designed Sticky Jump Diffusions, unifying masked, continuous, and hybrid diffusion; introduced Denoising Hazard Matching to learn reverse dynamics from a single classifier; validated on text, image, and reasoning benchmarks.
- Developed a self-distilled one-step diffusion sampler that achieves competitive sample quality and statistical estimation with $1/256$ of the cost.

Teaching Assistant

Jan 2023 – Present

Purdue University, Graduate Statistical Machine Learning

- Wrote and graded assignments and exams, held office hours, and delivered lectures on diffusion models.

Research Intern

Jun 2021 – Nov 2022

National Bank of Canada

- Designed a scoring framework (linkability, information gain) for privacy-preserving data release strategies.

Software Engineer Intern

May 2019 – Aug 2019

GRAITEC

- Developed full-stack features and fixes for a woodworking CAD application in an agile team environment.
